ABSTRACT

Article History: Received: 10-01-2025 Accepted: 12-02-2025 Published: 20-03-2025

KEYWORDS: Virchachika. Kshudra Kustha, Visha Tail.

Vicharchika (eczema), classified as Kshudra Kustha in Ayurveda, is a chronic skin disorder characterized by itching (Kandu), redness (Raga), discharge (Srava), and scaling (Pidika). The study explores the conceptual framework of treating Vicharchika through the application of Visha Tail, a polyherbal formulation. The formulation integrates potent herbs such as Tagar. Kaner, Vacha, Kustha, Aparajita, Manjistha, Haldi, Daruharidra, Arka, Vatsanabh, Gomutra, Sarshap, Chameli, Raktachandan, Nirgundi, and Saptaparna. Each herb possesses specific properties such as anti-inflammatory, antimicrobial, detoxifying, and blood-purifying effects. This synergistic approach targets the root cause by balancing aggravated Kapha and Pitta Doshas, alleviating symptoms, and promoting skin healing. The study concludes that Visha Taila offers a holistic and effective Avurvedic intervention for managing Vicharchika, though clinical validation and standardization remain essential.

INTRODUCTION

Vicharchika is a condition described in Avurvedic texts, characterized by distinct pathological changes in the skin. The prevalence of Vicharchika estimated 31.6 million people in the U.S. met the empirical symptoms criteria of eczema, and 17.8 million met the empirical criteria for atopic dermatitis^[1].

The term is deeply rooted in Sanskrit etymology, as explained in authoritative lexicons like Shabdakalpadruma.

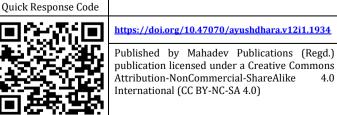

The defining features of Vicharchika include:

- 1. Cracking of the skin (*Tvak Vidarana*)- Most notably on the hands and feet.
- 2. Specific skin coatings or coverings, often forming in a pattern indicative of the disease's progression.

The etymology of the word is derived from the Sanskrit phrase:

"Visheshena care-ayate padasya Tvak vidaryate Anaya iti Vicharchika"

Access this article online

This means

"A condition that causes significant movement or displacement (care-ayate) of the skin, leading to distinct cracking or splitting (*Vidaryate*), especially on the feet."

This definition underscores the clinical presentation and unique characteristics of Vicharchika, aligning with the Ayurvedic perspective of skin disorders (Kushtha *rogas*). Definition in Ayurveda:

"Vicharchika is a type of Kushtha characterized by Kandu (intense itching), Srava (discharge), Pidaka (vesicular eruptions), and Rookshata (dryness or roughness)."

Key Features

4.0

Kandu: Excessive itching

Pidaka: Papular or vesicular eruptions on the skin.

Shyava Varna: Discoloration, often blackish or dark patches.

Srava: Oozing or wetness due to discharge^[2].

Rukshata: Dryness, leading to cracking and flaking of the skin.

Daha (Burning sensation): A burning or stinging sensation in the lesions may occur due to Pitta aggravation^[3].

Krishnata (Hyper-pigmentation): Long-standing lesions may result in hyper-pigmentation.

Vicharchika, often compared to eczema in modern dermatology, presents with specific symptoms according to Avurvedic texts. These symptoms result from the vitiation of the Doshas, especially Kapha, along with *Rakta* and *Pitta* involvement.

Other features include Rakta mav discoloration, swelling (Mamsa *Upachava*), and excessive moisture or stickiness (Prakilanna).

Types of Vicharchika

The features of Vicharchika can be categorized as follows:

- 1. Sravi Vicharchika: Characterized by excessive oozing or discharge.
- 2. Rooksha Vicharchika: Marked by drvness and roughness of the skin.

Eczema treatments in modern medicine are generally effective at managing symptoms, but they do come with certain drawbacks. These limitations can vary depending on the type of treatment and the individual's response to it.

Limitation of modern medicine

Topical steroid^[4] uses can causes skin thinning, burning itching, discolouration. Use of immunesuppresive^[5] medication causes suppression of immune system long term use causes potential organ damage. Biological therapies^[6] are expensive, pain, swelling. Rest treatments provide temporary relief.

Here in *Vicharchika* the patients are treated by Visha taila which has taken from Chikitsaarnav *Kustharogadhikar*. This drug has the potency to cure

Route of administration

eczema by its anti-bacterial, anti-microbial, wound healing property.

AIM and OBJECTIVE

- 1. To study the concept of *Taila kalpana* in *Kushtha* and conceptual study of effect of Visha Taila in management of Vicharchika.
- 2. To assess the efficacy of Visha Taila as a Shamana Sneha.
- 3. To evaluate the remission of the symptoms of Vicharchika/atopic dermatitis in patient treated with Visha taila.

MATERIAL AND METHOD

Method of Preparation

Vish Tail^[7]

Time of administration

Take half a part of the following ingredients: jasmine leaves, tagar, oleander root, Manjistha, Aprajita, Kuth, turmeric, Vacharcha, Daruhaldi, red sandalwood, *Nirgundi* leaves, *Manjisthi*, milk of the ark plant, and bark of the Sapthaparna. Additionally, take one part of purified Vatsanabha. Prepare a paste (Kalka) from these ingredients. Then, mix this paste with one *Prastha* (approximately 960ml) of mustard oil and four times the amount of cow urine. Prepare this mixture by cooking it as per the prescribed method.

This prepared oil effectively heals various types of wounds and ailments caused by poison, such as swelling, scabies, itching, cysts, ulcers, blisters, and sores resulting from poisoning. It provides quick relief when applied.

2	Kaner ^[10]	Nerium oleander	Rasa (Taste): Kaner is generally considered bitter (<i>Tikta</i>) and pungent (<i>Katu</i>). Guna (Quality): It is considered light (<i>Laghu</i>) and dry (<i>Ruksha</i>). Veerya (Potency): The potency of Kaner is hot (<i>Ushna</i>). Vipaka (Post-digestive effect): It likely has a pungent (<i>Katu</i>) post-digestive effect. Prabhava (Specific action): Kaner is used for its purgative and detoxifying effects. Karma- Kaner (Nerium indicum) treats Vicharchika (eczema) in Ayurveda through its Kushtaghna (anti-skin (<i>Valeriana wallichii</i>) disease), Krumighna (antimicrobial), and Raktashodhak (blood-purifying) properties. These helps balance aggravated Kapha and Pitta doshas, reduce inflammation, and cleanse the skin.	<i>Kaner</i> ^[11] contains a) Cardiac glycosides- Oleandrin Anti cancerous Anti- inflammatory, Anti-viral Neriin, Digitoxigenin, Gitoxigenin May have cardiotonic effects b) Flavonoids- Anti- inflammatory c) Saponins- Antimicrobial, immunomodulatory d) Tannins Astringent properties that help in wound healing and controlling bleeding.
3	Manjishta ^[12]	Rubia cordifolia	Rasa (taste): Bitter (<i>Tikta</i>), astringent (<i>Kashaya</i>), and sweet (<i>Madhura</i>). <i>Guna</i> (qualities): Heavy (<i>Guru</i>), dry (<i>Ruksha</i>). <i>Virya</i> (potency): Cooling (<i>Shita</i>) <i>Vipaka</i> (Post-digestive effect): Sweet (<i>Madhura</i>). <i>Prabhava</i> (Specific action): Excellent blood purifier, useful in treating skin disorders, and balancing <i>Pitta</i> . <i>Karma- Manjistha</i> (Rubia cordifolia): <i>Raktashodhak, Pittashamak –</i> Purifies blood and alleviates <i>Pitta</i> disorders	 <i>Manjishta</i>^[13] contains. a) Anthraquinones Rubiadin, Purpurin, Munjistin Alizarin, Lucidin Works as antibacterial and antifungal properties, antioxidant effects, protecting cells from damage. b) Iridoids Deoxyloganic acid, Morindin Works as anti-inflammatory Immune modulating properties, c) Glycosides Ruberythric acid- Works as skin health and wound healing Anti-inflammatory and antimicrobial effects quercetin d) Phenolic compounds Tannins- Its astringent properties that aid in wound healing. Anti-oxidant and detoxifying properties e) Flavonoids and related compounds anti-inflammatory antioxidant effects promotes skin health. f) Alkaloid

13	Saptparan ^[32]	Alstonia scholaris	Rasa (Taste): Bitter (<i>Tikta</i>) Guna (Qualities): Light (<i>Laghu</i>), dry (<i>Ruksha</i>) Virya (Potency): Heating (<i>Ushna</i>) Vipaka (Post-digestive Effect): Pungent (<i>Katu</i>) Prabhava (Specific Action): Antipyretic Karma- Saptaparn (Alstonia scholaris): Kushtaghna, Raktashodhak - Cleanses blood and treats chronic skin diseases.	Saptparan ^[33] contains 1. Alkaloids (Major Constituents) Echitamine, Scholaricine, Alstonine, Pseudoalstonine, Tabernaemontanine, Ditamine 2. Triterpenoids: α -amyrin, β -amyrin, Lupeol 3. Flavonoids: Quercetin, Kaempferol 4. Phenolic Compounds: Chlorogenic acid, Gallic acid 5. Saponins: Responsible for the plant's detergent-like properties. 6. Glycosides: Echitoside 7. Sterols: β -sitosterol 8. Other Constituents: Coumarins, Tannins
14	Vatsanabh ^[34]	Aconitum ferox	Rasa (Taste): Bitter (<i>Tikta</i>), astringent (<i>Kashaya</i>) Guna (Qualities): Light (<i>Laghu</i>), sharp (<i>Tikshna</i>) Virya (Potency): Heating (<i>Ushna</i>) Vipaka (Post-digestive Effect): Pungent (<i>Katu</i>) Prabhava (Specific action): Highly toxic; used in minute, purified doses for its potent analgesic and anti- inflammatory effects. Karma-Vatsanabha (<i>Aconitum ferox</i>): Deepana, Kustaghna – Detoxifies and balances Doshas in skin disease.	 Vatsanabh^[35] contains 1. Alkaloids (Main Active Constituents): Aconitine: A potent neurotoxin and analgesic. Hypaconitine: A derivative with anti-inflammatory properties. Mesaconitine: Less toxic than aconitine but retains pharmacological activity. Atisine: Known for anti- inflammatory and wound- healing properties. Delphinine: Contributes to its analgesic and antimicrobial effects. 2. Flavonoids: Provide antioxidant and anti- inflammatory effects, promoting skin healing and reducing oxidative stress. 3. Tannins: Contribute to astringent and wound-healing properties. 4. Essential Oils and Resin: Have antimicrobial and skin-soothing effects. 5. Polysaccharides: Aid in skin hydration and barrier repair

15	Sarshap ^[36]	Brassica compestris	 AYUSHDHARA, 2023;12(1):1-11 1. Rasa (Taste): Pungent (Katu). 2. Guna (Qualities): Light (Laghu), sharp (Tikshna), dry (Ruksha) 3. Virya (Potency): Heating (Ushna). 4. Vipaka (Post-digestive Effect): Pungent (Katu). 5. Prabhava (Specific Action): Kapha hara (reduces Kapha), clears blockages, and enhances digestion. Effective in treating joint pain, respiratory conditions (like asthma and cough), and skin disorders when used externally or internally in appropriate doses. Karma- Sarshap (Brassica campestris): Kaphaghna, Kushtaghna – Reduces Kapha and treats skin disorders. 	Sarshap ^[37] contains 1. Essential Oil (Mustard Oil) Allyl isothiocyanate: Major pungent compound with antimicrobial properties. Sinigrin: A glucosinolate that breaks down to allyl isothiocyanate. Oleic acid: Monounsaturated fatty acid. Linoleic acid: Polyunsaturated omega-6 fatty acid. Erucic acid: Long-chain monounsaturated fatty acid. 2. Glucosinolates Sinigrin, Gluconapin, Glucotropaeolin 3. Flavonoids Kaempferol, Quercetin 4. Phenolic Compounds Caffeic acid, Ferulic acid 5. Alkaloids: Minor alkaloids contributing to bioactivity. 6. Proteins: High-quality plant proteins found in the seeds. 7. Vitamins: Vitamin A, C, and K in the leaves. Vitamin E in the oil. 8. Minerals Calcium, magnesium, phosphorus, potassium, iron 9. Enzymes Myrosinase: Hydrolyzes glucosinolates to produce bioactive isothiocyanates.
16	Gomutra ^[38]	Cow urine	Rasa (Taste): Gomutra is typically described as bitter (<i>Tikta</i>) and pungent (<i>Katu</i>). Guna (Quality): It is considered light (<i>Laghu</i>) and dry (<i>Ruksha</i>). Veerya (Potency): Gomutra is regarded as heating (<i>Ushna</i>). Vipaka (Post-digestive effect): It is believed to have a pungent (<i>Katu</i>) post-digestive effect. Prabhava (Specific action): Gomutra is known for its detoxifying properties, aiding in the elimination of toxins (<i>Ama</i>) from the body. Karma- Gomutra (Cow urine): Kaphahara, Krimighna – Detoxifies the body and balances Kapha	Gomutra ^[39] contains 1. Water (Major Component) Gomutra consists of approximately 95–96% water, which helps in detoxification and hydration. 2. Urea: Present in significant quantities (2.5–3%). Urea contributes to its diuretic and antimicrobial properties. 3. Minerals Sodium, potassium, phosphorus calcium, magnesium, sulphur 4. Volatile and non-volatile organic compounds phenols aldehydes ketones, fatty acids

10. Antioxidants
Anti-oxidative enzymes and
compounds that scavenge free
radicals.

DISCUSSION

The conceptual study of *Vicharchika* through 6 the application of *Visha Taila* underscores its relevance as a traditional Ayurvedic remedy for chronic eczema. *Vicharchika*, resulting from imbalances in *Kapha* and *Pitta Doshas*, manifests with symptoms like intense itching, inflammation, and discharge, leading to significant discomfort. The polyherbal composition of *Visha Taila* provides a multi-pronged approach for addressing these symptoms.

Therapeutic Role of Ingredients

- 1. *Tagar* (*Valeriana jatamansi*), *Kaner* (*Nerium indicum*), and *Vacha* (*Acorus calamus*): These herbs exhibit anti-inflammatory and antimicrobial properties, helping to reduce swelling, itching, and secondary infections.
- 2. *Kustha* (*Saussurea lappa*) and *Aparajita* (*Clitoria ternatea*): Known for their blood-purifying and skin-regenerative effects, they aid in detoxifying the skin and reducing discoloration.
- 3. *Manjistha* (*Rubia cordifolia*) and *Raktachandan* (*Pterocarpus santalinus*): These herbs promote detoxification, improve blood circulation, and enhance the complexion of affected skin.
- 4. *Haldi (Curcuma longa)* and *Daruharidra (Berberis aristata)*: Their potent anti-inflammatory and antibacterial actions accelerate wound healing and soothe irritated skin.
- 5. *Arka* (*Calotropis procera*) and *Nirgundi* (*Vitex negundo*): These herbs reduce itching and inflammation, improving skin texture and providing symptomatic relief.

- 6. *Vatsanabh (Aconitum ferox*): When used in minute quantities, it acts as a potent detoxifier and pacifies aggravated Doshas.
- 7. *Chameli* (*Jasminum officinale*): *Chameli* soothes skin irritations and enhances the overall therapeutic effect of the formulation.
- 8. *Saptaparna* (*Alstonia scholaris*): Known for its antipruritic and detoxifying properties, it helps alleviate itching and improves skin health.
- 9. *Gomutra* (Cow's urine) and *Sarshap* (*Brassica campestris*): These components enhance the bioavailability of the active ingredients, providing a medium for deeper penetration and detoxification.
- 10. *Kaner (Nerium indicum)*: Known for its detoxifying and anti-pruritic actions, *Kaner* alleviates itching and promotes skin regeneration.

Mechanism of Action

The Visha Taila formulation functions by targeting the Dosha imbalances that underlie Vicharchika. Anti-inflammatory agents reduce redness and swelling, while blood-purifying herbs eliminate toxins from the body. The lipid base of the oil ensures deep penetration into the skin, delivering the active compounds directly to the affected tissues. Together, these ingredients provide symptomatic relief and prevent recurrence by addressing the root cause of the disorder.

Advantages of Visha Taila

The holistic approach of *Visha Taila* not only alleviates symptoms but also restores skin health and balances systemic *Doshas*. Its topical application is

non-invasive, making it a preferred choice for patients with chronic conditions like eczema.

Limitations and Future Scope

Despite its promising properties, the potential toxicity of certain ingredients like *Vatsanabh* and *Kaner* necessitates careful formulation and dosage standardization. Further clinical studies and pharmacological research are needed to validate the efficacy and safety of *Visha Taila*.

CONCLUSION

The application of Visha Taila offers a comprehensive Ayurvedic approach to managing Vicharchika. Its multi-herbal composition addresses both symptoms and the root causes of eczema by balancing Kapha and Pitta Doshas, detoxifying the body, and promoting skin healing. While traditional use and textual references highlight its efficacy, modern research and clinical validation are essential for broader acceptance and application. Standardization of ingredients, dosage. and formulation will further enhance its therapeutic potential and ensure safety. Thus, Visha Taila emerges as a promising remedy for chronic skin disorders in alignment with Avurvedic principles.
